

## Mandatory Language for Monitoring and Reporting Violation

### Chemical Sampling

#### CHEMICAL MONITORING, ROUTINE MAJOR

WEST ROOSEVELT MOBILE HOME PARK PWS ID 1520232 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Public water systems are required to collect and submit chemical samples of water provided to their customers and report the results of those samples to the TCEQ on a regular basis.

We failed to monitor and/or report the following constituent and Monitoring Periods:

<u>Constituent</u>	<u>Monitoring Period</u>
<u>NITRATE</u>	<u>2014</u>
<u>RAD</u>	<u>3YR2019</u>
<u>DBP1</u>	<u>2010</u>

Results of regular monitoring are an indicator of whether or not your drinking water is safe from chemical contamination. We did not complete all monitoring and/or reporting for chemical constituents, and therefore TCEQ cannot be sure of the safety of your drinking water during that time.

We are taking the following actions to address this issue: \_\_Samples for Nitrate and disinfectant by products have been routinely collected and compliance has been maintained. These violations occurred while the park was owned by Fuller MHP but we are still required to post these notices. The RAD testing was performed in 2019 but we did not receive the results and are currently getting the test results to return to compliance.

*Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*
